## QUESTIONNAIRE WHALE SHIP-STRIKE PROJECT

Collisions between boats and whales are increasing. It is estimated that these impacts, most often fatal, are **several thousand** each year.

The World Sustainability Foundation cares about the whale's fate and is looking for new strategies to mitigate collisions.

With the following questionnaire we would like to know your point of view and understand how to improve together.

Thanks for your cooperation!

1. Were you aware of the collisions between boats and whales?

- a) Yes
- b) No

2. Do you think there's little talk about this problem?

- a) Yes
- b) No

3. If you were the captain of a ship, what would you do to mitigate the risk of whale collisions?

- a) I would slow down
- b) I would change route to get to my destination
- c) I would opt for observation shifts on board
- d) I would rely on professionals to solve the problem

4. Slow-down measures seem to be the most effective tool to reduce collisions, as a passenger would you agree?

- a) Yes
- b) No, I don't want to be late

5. If not, what alternative strategies would you propose?

6. Would you buy products that are transported by ships that have collisions with cetaceans?

- a) Yes
- b) No
- c) I don't care
